

hi-Ear is the trendiest music earmuff ever invented: it keeps your ears warm all winter long while listening to your favourite music. The built-in speakers of hi-Ear are invisible: we have sewn them to the lining that covers the inside of these comfortable earmuffs to make them more practical and to improve their performance. You will no longer need to use any headphones or earbuds for listening to music and calling your friends: hi-Ear will perfectly match your style! In addition to the built-in speakers, in fact, hi-Ear is also equipped with a fabric cable with switch, microphone and shuffle control. You can adjust hi-Ear to your size and connect it to any devices with a 3.5mm universal jack.
